Introduction

HBL400 is a multi-biometric, fully automatic smart lock with a built-in indoor monitoring screen. This smart lock can unlock through facial recognition, smartphone fingerprint, IC card and pin code password. Also, HBL400 will lock the door, when users open the door with a smartphone. HBL400 is compatible with ZSmart, an application designed for home automation.

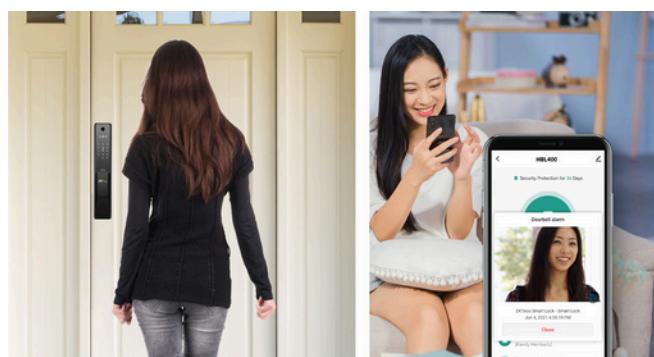

Scenarios

Automatic locking and unlocking after verification

Watch outdoor environment on LCD screen

When someone requests remote unlock outside, the owner could take a look at the person through ZSmart App, and unlock for them via the App

When there is a break-in or incorrect password input for 5 times, the intrusion alarm system will be triggered

Features

3D Structured Light Facial Recognition

3D Structured Light Facial Recognition
Quick verification and unlock

Temporary Access

Sharedigital keysvalidforspecific time
to friends or guests

Supports Remote Mobile App

Unlock and manage the lock from anywhere

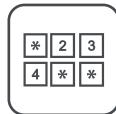

Wi-Fi Communication

Ensure a fast and stable by Wi-Fi IEEE
802.11b/g/n (2.4GHz Wi-Fi)

Audio Instructions

User-friendly audio prompts,
support English and Spanish

Random Passcode

Add random digits to protect your
passcode from prying eyes

Capacitive Fingerprint Sensor

Fast verification for dry and rough fingers

Emergency Charging Port

Charging via the micro-USB port

Smart Alerts

Receive real-time notifications of low battery,
hijack and offline

Built-in Doorbell

Built-in electronic doorbell
Need not deploy a physical doorbell

Lock Automatically

The deadbolt will protrude when you close the
door immediately, no extra action required

Capture Photos / Videos

Capture photos/videos and save in
TF card (support max. 128 GB), who requests
remote unlock or press the doorbell
